

## Asset Track Release Notes

### Release 6.3.25

Release Date: 4/2/2013

**Note 1: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.**

#### Features Added:

- Added support for Opticon Scanners in all Editions
- Added support for UV printing with DataCard printers
- Added support for UHF encoding with MagiCard printers

#### Enhancements / Bug Fixes:

- Fixed an issue with PDF417 barcodes not encoding certain characters properly
- Fix Light Client bug where Workstation Options would be reset after connecting to Jolly Server

### Release 6.3

Release Date: 10/11/2012

**Note 1: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.**

#### Enhancements / Bug Fixes:

- Database schema editor now supports MS SQL Server based databases
- In addition to rules that allow check in/out, create rules that deny access
- Light Client now supports multiple Groups
- All desktop products including Jolly Server now support Windows 8 and Jolly Server 2012
- Easily convert from Jolly Internal Server to Jolly Server

### Release 6.2

Release Date: 06/26/2012

Note: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

#### Features Added:

© 2012 Jolly Technologies Inc. All rights reserved.

<http://www.jollytech.com>

- Added new “Lite Edition” to all products that can only be used for a specific purpose; replaces Scan Station, Print Station, Report Station Editions
- Asset record data can be stored in the Jolly Server

#### Enhancements / Bug Fixes:

- A Workstation Task has been added named Mobile Sync which allows for syncing data with a device running Jolly Scan Station Mobile; this replaces the standalone Scan Station Mobile Sync app
- Jolly Server installers now create a 2<sup>nd</sup> database containing the tables from the Sample Database
- The Sample Database data source option has been renamed to Internal Jolly Server and is no longer visible when connected to the Jolly Server; if the user still needs to connect to the Sample Database when using Jolly Server, they should use the MS Access data source option; this is automatically selected by the software if already configured to use the Sample Database while connected to Jolly Server
- Added “Auto-update record” and “Send e-mail” functionality to the registration process
- The Print button is now available in Designer > Database Setup UI
- Added support for building a record form drop down list containing all values present in the associated database column
- Fixed an error that occasionally occurred when printing to Zebra RFID printer
- Fixed a bug where Workstation Profiles were not saving properly
- Other minor bug fixes and feature enhancements

#### Release 6.1

Release Date: 02/17/2012

Note: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

#### Features Added:

- Support for Jolly Scan Station Mobile
- Optionally prompt user to update record fields during check in / out in Premier Edition

#### Enhancements / Bug Fixes:

- Tool to migrate data from Jolly Internal Server (JLT file) to MS SQL Server-based Jolly Server
- Save advanced, driver-specific printer settings
- Resize database images based on max pixel size

© 2012 Jolly Technologies Inc. All rights reserved.

<http://www.jollytech.com>

- Set database image JPEG compression level
- Set database image file type on per-database field basis
- Support for additional database image types
- Save record import settings
- Improved support for non-English characters
- Fix for workstation options reverting to defaults when the software is restarted immediately after being shut down or launched twice in quick succession
- Miscellaneous bug fixes

#### Support for Additional Canon Cameras

- EOS-1D Mark III
- EOS 40D
- EOS-1Ds Mark III
- EOS DIGITAL REBEL Xsi/450D/ Kiss X2
- EOS DIGITAL REBEL XS/ 1000D/ KISS F
- EOS 50D
- EOS 5D Mark II
- EOS Kiss X3/EOS REBEL T1i /EOS 500D
- EOS 7D
- EOS-1D Mark IV
- EOS Kiss X4/EOS REBEL T2i /EOS 550D
- EOS 60D
- EOS Kiss X5/EOS REBEL T3i /EOS 600D
- EOS Kiss X50/EOS REBEL T3 /EOS 1100D

#### Release 6.0

Release Date: 11/16/2011

Note 1: Microsoft .NET Framework 4.0 or newer is required

Note 2: Record filters have been enhanced; any stored filters you have created will need to be updated.

Note 3: Workstation Settings and Asset Group settings have changed; review your settings after upgrade.

© 2012 Jolly Technologies Inc. All rights reserved.

<http://www.jollytech.com>

Note 4: Shared Company Files (.jlt) are no longer supported; you must use Jolly Server when sharing asset data between multiple workstations

Features Added:

- Asset deprecation functionality
- RFID label support
- QR Code support

Enhancements / Bug Fixes:

- Replaced Company Server with Jolly Server, a more robust implementation
- Improved locking to protect shared resources
- Simplified Workstation and Asset Group Settings
- Multiple workstation printer support
- Added Task Configuration button to each task
- Auto-format label text
- Support for additional languages
- Minor bug fixes and enhancements

Release 5.1.0

Release Date: 03/16/2011

Features Added:

- Link Asset Track user accounts to Active Directory user accounts
- Improved Oracle support

Enhancements / Bug Fixes:

- Support for a 15 digit UID default value
- Improved support for non-western languages and fonts including Arabic, Cyrillic, Greek, Hebrew and Turkish
- Display a results summary after record import
- Minor bug fixes and enhancements

Release 5.0.2

Release Date: 10/06/2010

Features Added:

- None

Enhancements / Bug Fixes:

- Support for specifying an Active Directory / LDAP Borrower Lookup filter
- Automatically detect Active Directory / LDAP Borrower Lookup server and directory
- Minor bug fixes and enhancements

## Release 5.0 / 5.0.1

Release Date: 07/26/2010

The version 5.0 family of products offers new functionality that version 4.0 clients cannot utilize so if you have multiple installations that share data, you must upgrade each installation.

### Features Added:

- Significantly improved database performance when connecting to large and/or remote databases
- Configure separate printers for printing labels and reports
- New Record Center record filter option
- Company Database can be installed to user's existing MS SQL Server instance; user can then manage the database and access log data
- Support for serial-port based barcode scanners
- Opticon mobile barcode scanner integration
- Support for manual update fields with batch check in / out
- Support for Microsoft Access 2007
- On screen keyboard and other kiosk improvements
- Tutorial demo links added to Help menu

### Features Enhanced / Modified / Bug Fixes:

- \*\*\* The design preview shown in the Main Menu is now a static image that can be set by the user
- \*\*\* User Fields have been replaced with Manual Update Fields that allow users to update record values via a form during Check In / Out
- Fixed issue where the software process would not always terminate when closed
- 100+ general UI and feature enhancements
- Several minor bug fixes
