

Lobby Track Release Notes

Release 6.3.25

Release Date: 4/2/2013

Note 1: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

Features Added:

- Added support for Opticon Scanners in all Editions
- Added support for UV printing with DataCard printers
- Added support for UHF encoding with MagiCard printers

Enhancements / Bug Fixes:

- Fixed an issue with PDF417 barcodes not encoding certain characters properly
- Fix Light Client bug where Workstation Options would be reset after connecting to Jolly Server

Release 6.3

Release Date: 10/11/2012

Note 1: Read 6.0 Release Notes if upgrading from version 5 or earlier for important information.

Note 2: The check in / out rules have been enhanced. As the result of an architecture change, the pre-defined “Deny when Inactive” and “Deny when Expired” rules have been removed. You will need to re-create these rules if you use them.

Enhancements / Bug Fixes:

- Database schema editor now supports MS SQL Server based databases
- Support for HID iClass Corp 1000 2k/2k smart cards
- In addition to rules that allow access, create rules that deny access
- Support for Amber Road watch list provider
- Support for SHI C*Cure 800 access control system
- Support for smart card encoding and Zebra ZXP 8 printer
- Light Client now supports multiple Groups
- All desktop products including Jolly Server now support Windows 8 and Jolly Server 2012

© Jolly Technologies Inc 2012. All rights reserved.

<http://www.jollytech.com>

- Easily convert from Jolly Internal Server to Jolly Server
- Improved Mobile Scan Station support including support for multiple groups
- Fix for loading images from the web with special path characters

Release 6.2

Release Date: 06/26/2012

Features Added:

- Added new “Light Edition” to all products that can only be used for a specific purpose; replaces Scan Station, Print Station, Report Station Editions
- Visitor record data can be stored in the Jolly Server

Enhancements / Bug Fixes:

- A Workstation Task has been added named Mobile Sync which allows for syncing data with a device running Jolly Scan Station Mobile; this replaces the standalone Scan Station Mobile Sync app
- Added support for the SnapShell Passport scanner
- Added the ability to parse the data returned by MIFARE, Prox and Smart Card commands
- Jolly Server installers now create a 2nd database containing the tables from the Sample Database
- The Sample Database data source option has been renamed to Internal Jolly Server and is no longer visible when connected to the Jolly Server; if the user still needs to connect to the Sample Database when using Jolly Server, they should use the MS Access data source option; this is automatically selected by the software if already configured to use the Sample Database while connected to Jolly Server
- Added “Auto-update record” and “Send e-mail” functionality to the registration process
- Added the ability to change the NDA title
- The Print button is now available in Designer > Database Setup UI
- Added support for connecting the Watch List feature to database “Views”
- Added support for building a record form drop down list containing all values present in the associated database column
- Fixed an error that occasionally occurred when printing to Zebra RFID printer
- Fixed a bug where Workstation Profiles were not saving properly
- Other minor bug fixes and feature enhancements

Release 6.1

Release Date: 02/17/2012

© Jolly Technologies Inc 2012. All rights reserved.

<http://www.jollytech.com>

Features Added:

- Support for Jolly Scan Station Mobile
- Johnson Controls access control system integration
- SHI C-Cure 9000 access control system integration
- Optionally prompt user to update record fields during check in / out in Premier Edition

Enhancements / Bug Fixes:

- Support for Topaz optical fingerprint pads on 64-bit systems
- Tool to migrate data from Jolly Internal Server (JLT file) to MS SQL Server-based Jolly Server
- Save advanced, driver-specific printer settings such as K-panel area
- Resize database images based on max pixel size
- Set database image JPEG compression level
- Set database image file type on per-database field basis
- Support for additional database image types
- Save record import settings
- Improved support for non-English characters
- Fix for workstation options reverting to defaults when the software is restarted immediately after being shut down or launched twice in quick succession
- Miscellaneous bug fixes

Support for Additional Canon Cameras

- EOS-1D Mark III
- EOS 40D
- EOS-1Ds Mark III
- EOS DIGITAL REBEL Xsi/450D/ Kiss X2
- EOS DIGITAL REBEL XS/ 1000D/ KISS F
- EOS 50D
- EOS 5D Mark II
- EOS Kiss X3/EOS REBEL T1i /EOS 500D
- EOS 7D
- EOS-1D Mark IV
- EOS Kiss X4/EOS REBEL T2i /EOS 550D
- EOS 60D
- EOS Kiss X5/EOS REBEL T3i /EOS 600D

- EOS Kiss X50/EOS REBEL T3 /EOS 1100D

Release 6.0

Release Date: 11/16/2011

Note 1: Microsoft .NET Framework 4.0 or newer is required

Note 2: Record filters have been enhanced; any stored filters you have created will need to be updated.

Note 3: Workstation Settings and Visitor Group settings have changed; review your settings after upgrade.

Note 4: Shared Company Files (.jlt) are no longer supported; you must use Jolly Server when sharing visitor data between multiple workstations

Features Added:

- RFID label support

Enhancements / Bug Fixes:

- Replaced Company Server with Jolly Server, a more robust implementation
- Improved locking to protect shared resources
- Simplified Workstation and Visitor Group Settings
- Multiple workstation printer support
- Added Task Configuration button to each task
- Auto-format visitor badge text
- Support for additional languages
- Minor bug fixes and enhancements

Release 5.2.0

Release Date: 06/20/2011

Note 1: Microsoft .NET Framework 3.5 SP1 or newer is required

Note 2: After installing this update, you may need to reconfigure your watch list settings

Features Added:

- Add QR Code barcode support
- Added Mark Absent task

© Jolly Technologies Inc 2012. All rights reserved.

<http://www.jollytech.com>

Enhancements / Bug Fixes:

- Save NDA / Signature to a file
- Show NDA / Signature capture during Check In / Out
- Optionally save images to non-jpeg formats during registration
- Enhanced image importing
- Allow database views to be selected as watch list sources
- Fix kiosk mode issue on some Windows 7 PCs
- Several minor bug fixes and enhancements

Release 5.1.0

Release Date: 03/16/2011

Features Added:

- Support for reading / writing MIFARE cards
- Support for reading Proximity cards
- Support for printing to Fargo UV / F-panel

Enhancements / Bug Fixes:

- Several minor bug fixes and enhancements

Release 5.0.3

Release Date: 01/18/2011

Features Added:

- Support for S2 Access Control System
- Support for DSX Access Control System
- Support for Topaz optical fingerprint scanners
- Link Lobby Track user accounts to Active Directory user accounts
- Improved Oracle support
- Populate record forms by scanning the 2D barcode or magnetic stripe on a North American driver's license or ID card

Enhancements / Bug Fixes:

- Support for a 15 digit UID default value
- Configure multiple Active Directory searches for Host Lookup
- Improved support for non-western languages and fonts including Arabic, Cyrillic, Greek, Hebrew and Turkish
- Attendance log fix for PCs configured to use a comma character instead of a decimal point
- Improved the automatic image reduction feature to support bitmap images
- Fix for Topaz signature crop and edit issue
- Improved image path support for certain TIF and JPEG images
- Display a results summary after record import
- Minor bug fixes and enhancements

Release 5.0.2

Release Date: 10/06/2010

Features Added:

- Support for MK Denial watch list

Enhancements / Bug Fixes:

- Support for specifying an Active Directory / LDAP Host Lookup filter
- Automatically detect Active Directory / LDAP Host Lookup server and directory
- Automatically downscale large images to max size threshold
- Minor bug fixes and enhancements

Release 5.0.1

Release Date: 07/20/2010

Due to enhancements to the way time and attendance is logged, log entries made prior to 5.0.1 will lose the time component from the check in / out date and time. Total time worked will not be affected and will still be accurate. New entries will include the full date and time.

Features Added:

- Support for AMAG access control system
- Support for opening turnstile or entry gate
- Support for calculating time and attendance when using batch check in / out
- Support for manual update fields with batch check in / out
- Encode binary data in 2D barcode

Enhancements / Bug Fixes:

- Database performance improved when using field auto-updates, access rules and on-screen messages
- Replaced Expected Visitor's List with improved Today's List task
- General UI enhancements and minor bug fixes

Release 5.0

Release Date: 05/25/2010

Before installing the 5.0 upgrade, read the following information as well as notes marked ***.

© Jolly Technologies Inc 2012. All rights reserved.

<http://www.jollytech.com>

The version 5.0 family of products offers new functionality that version 4.0 clients cannot utilize so if you have multiple installations that share data, you must upgrade each installation.

Also, you cannot run version 5.0 products on the same PC as version 4.0 products, for instance, you cannot install Lobby Track 5.0 and Asset Track 4.0 on the same PC. Both versions must be either 5.0 or 4.0.

Features Added:

- Significantly improved database performance when connecting to large and/or remote databases
- Configure up to 3 printers to be used specifically for printing cards, labels or reports
- New Record Center record filter option
- Company Database can be installed to user's existing MS SQL Server instance; user can then manage the database and access log data
- Integration with 3rd party Access Control Systems including Brivo and Lenel
- Canon flash camera support
- Photo face-detection and auto-crop
- Records with photos stored as files outside the database can be easily edited in Lobby Track
- Support for serial-port based barcode scanners
- Export photos and auto-generate a data field photo path
- Print badge during check in
- Opticon mobile barcode scanner integration
- Support for Microsoft Access 2007
- On screen keyboard and other kiosk improvements
- Tutorial demo links added to Help menu

Features Enhanced / Modified / Bug Fixes:

- *** The design preview shown in the Main Menu is now a static image that can be set by the user
- *** User Fields have been replaced with Manual Update Fields that allow users to update record values via a form during Check In / Out
- *** The Tardy and Absent Tracking features are only available in School Tardy Edition and School Complete Editions
- *** The Automatically Mark Absent feature has been moved to the new Attendance tab and must be reconfigured if upgrading from 4.3
- Send watch list email notifications
- Configure watch list online database to check against all criminal records or sex offenders only
- Evacuation Report is now configurable

© Jolly Technologies Inc 2012. All rights reserved.

<http://www.jollytech.com>

- Fixed issue where the software process would not always terminate when closed
- 100+ general UI and feature enhancements
- Several minor bug fixes

Features Removed:

- *** The Equipment Tracking functionality has been removed; users interested in tracking equipment should consider Jolly Asset Track software which offers a significantly improved version of equipment tracking*
- *** Removed outdated Interlink fingerprint pad SDK integration as the devices are no longer manufactured and SDK is outdated

Release 4.3

Release Date: 07/23/2009

Important Note: Due to enhancements to date / time and database field comparison, existing access rules, alerts/on-screen messages, print conditions, host lookup and watch list settings should be reviewed after upgrading from previous versions.

Features Added:

- Gather additional information from user during Check In / Out with User Field form
- Scan and process business cards during registration
- Mark people as absent or tardy
- Check visitors against online watch lists
- Check for duplicate records

Enhancements / Bug Fixes:

- Significant performance improvements when working with large, networked databases
- Immediate discovery of records added via other workstations
- Allow workstation profiles and groups to be shared between Jolly products
- Added authentication to e-mail server settings
- Additional auto-update record field options and data
- Improved Active Directory support
- Minor bug fixes and UI enhancements

Release 4.2

Release Date: 03/02/2009

Features Added:

- Added Setup Wizard for visitor group and workstation configuration

© Jolly Technologies Inc 2012. All rights reserved.

<http://www.jollytech.com>

- Check visitors in / out in the background using a barcode scanner
- Play configurable sounds when check in / out / error occurs
- Global Settings synchronization

Enhancements / Bug Fixes:

- Redesign of record layout and data formatting UI's
- Redesign of host lookup feature
- Redesign of watch list feature
- Addition of 4 new log report fields and 6 additional time and attendance report fields, raising the total for each to 8
- Permission added for modifying time and attendance data
- Added option to only show background image on default screen
- Improved support for date / time related conditions
- Evacuation Report is more configurable
- The NDA can be printed
- Minor bug fixes and UI enhancements

Features Removed:

- Numeric data formatting has been removed with the exception of decimal places
- Image auto-edit feature

Release 4.1

Release Date: 12/18/2008

Features Added:

- Added Record Queries to Report Center
- Set workstation background color and image

Enhancements / Bug Fixes:

- Redesign of visitor group setup
- Redesign of access rules and entry / exit conditions
- Remove feature distinctions between one time and multiple visit guests
- Simplified auto-update database fields configuration
- Improved auto-resize font performance
- Added new profiles, visitor groups and samples
- Updated language database
- Improved record layout functionality
- Improved startup times and overall performance
- Improved database connectivity times when connecting to large database with many tables
- Minor bug fixes and UI enhancements

Release 4.0.3

© Jolly Technologies Inc 2012. All rights reserved.

<http://www.jollytech.com>

Release Date: 10/14/2008

Features Added:

None

Enhancements / Bug Fixes:

- Fixed issue where card scanner settings were not always saved
- Fixed card scanner photo acquisition issue

Release 4.0.2

Release Date: 9/25/2008

Features Added:

- Workstation Profiles

Enhancements / Bug Fixes:

- Improved visitor registration process flow, ability to skip certain steps
- Add automap functionality to card scanner and record import
- Add card scanner functionality to Record Center interface
- Add card scanner auto-feed support
- Improved language translations
- Minor bug fixes

Release 4.0.1

Release Date: 8/12/2008

Features Added:

None

Enhancements / Bug Fixes:

- Improved fingerprint and signature pad support
- Improved language translations
- Minor bug fixes

* Asset Track license sold separately
