Third Party Screening Information – Watch List integration support

Lobby Track can automatically compare your visitor's information against local and/or online watch lists during registration. Lobby Track Premier is required to have the ability to perform online watch list checks.

Local Watch Lists:

A Local Watch List can assist you during the registration process by warning you of potential matches in any of the following categories:

1.) Ex-Employee's
2.) Previous Trespassers
3.) Potentially Violent Persons such as Ex-Spouses, Stalkers, or Protestors
4.) Employees of Competitors
5.) Investigators or other 'research' visitors
6.) Anyone who you want to be warned of if they attempt to visit your facility.

To be warned of any person, simply add their name to the Watch List group inside of Lobby Track. It's that Simple!

Online Watch Lists:

The Online Watch Lists we integrate with have a wide variety of lists that can be subscribed to. The most common lists are Sex-Offender registry checks and Federal Background Checks. The current online watch list providers that are supported are as follow:

First Advantage:

Website: http://www.fadv.com

Most commonly used for Sex-Offender registry checks.

Screening Information Details: http://www.fadv.com/screening-and-assessment/

MKData:

Website: http://mkdataservices.com

Most commonly used for the very detailed background checks regarding federal registry lists. These include Treasury Dept., State Dept., Commerce Dept., lists and more.
